

Washing Line Melody

Ilona Skladzien

In *Washing Line Melody*, Ilona explores the space in between the mundane and the magical.

This exhibition invites viewers to pause and reconsider their every day domestic chores through a different lens—one of imagination and play.

A small child brings disruption to the carefully structured routines of adult life, yet with that comes an infusion of the unexpected and spontaneous.

For a child, every object and task holds endless possibilities. Objects such as a washing line, a washing machine and a clothes dryer become vessels for adventure. For a parent, however, the same items might represent the weight of daily responsibilities, duty and routine.

Washing Line Melody looks at domestic chores as offering the potential for our responsibilities and imagination to intertwine, creating a subtle dance of possibilities.
